SUMMARY

Full-stack engineer with 2+ years of production frontend experience and recent specialization in backend development and DevOps. Skilled in React, TypeScript, and Node.js for application development; Docker, GitHub Actions, AWS, and Terraform for containerization and infrastructure automation. Comfortable owning features end-to-end — from REST API design and database modeling to CI/CD pipelines and cloud deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HCL (Terraform)

Frontend: React, Next.js, Tailwind CSS, Bootstrap, Sass, HTML5, CSS3

Backend: Node.js, Express, REST APIs, JWT Authentication, MongoDB

Databases: MongoDB, SQL, Firebase, Supabase

DevOps & Cloud: Docker, Docker Compose, GitHub Actions (CI/CD), AWS (EC2, S3, VPC, Security Groups), Terraform, Nginx, Linux

Tools: Git, GitHub, Bitbucket, Postman, VS Code

WORK EXPERIENCE

Frontend Developer — Wellahealth *Aug 2024 – Present* • Build and ship responsive interfaces for a healthcare fintech dashboard (erx.ui) using React, TypeScript, and Bootstrap, serving doctors and pharmacies across a multi-tenant platform.

- Engineered a real-time patient-doctor chat feature using SignalR for live messaging, IndexedDB for offline caching, and SWR for data sync — handling reconnection, race conditions, and session state across re-logins.
- Integrated REST APIs for real-time data display, resolved cross-browser UI bugs, and contributed to code reviews to maintain a clean, scalable codebase.

Data Analyst — Access Bank *Apr 2023 – Jan 2024* • Analyzed performance data for 70,000+ POS terminals nationwide using Excel and SQL, surfacing patterns in regional transaction volume and downtime.

- Delivered dashboards and recommendations to business stakeholders, contributing to operational decisions on terminal allocation and revenue optimization.

PROJECTS

Student Records API — Containerized Full-Stack App with CI/CD

Built a Dockerized full-stack student records system: Express + MongoDB backend, React frontend served via Nginx, orchestrated with Docker Compose. Implemented a GitHub Actions pipeline that runs tests, builds both images, and pushes to Docker Hub with `latest` and commit-SHA tags for traceable, rollback-friendly deploys.

Stack: Node.js, Express, MongoDB, React, Docker, Docker Compose, GitHub Actions, Nginx |

github.com/Adaobilynda1234/STUDENT-RECORD-API

Student Performance Analysis API — Tech4Dev Group 55

Designed and built the backend powering an AI-driven student performance platform. Implemented JWT-based authentication with multi-step registration, invite verification, and password setup flows. Built CSV bulk-upload endpoints (multipart/form data) feeding an ML prediction model that recommends personalized improvement strategies.

Stack: Node.js, Express, MongoDB, JWT, Multer, ML model integration | documenter.getpostman.com/view/45518060/2sBXcGDz5P

SorenksAttorneys — Law Firm Website

Designed and built a client-facing website for a Nigerian law firm specializing in legal representation and property consultancy. Implemented a consultation booking flow, case-inquiry submission forms, and educational content on common legal issues — with a focus on responsive design, clear information hierarchy, and accessibility.

Stack: React, Tailwind CSS, Vercel | sorenksattorneys.vercel.app

EDUCATION & CERTIFICATIONS

Tech4dev Backend Development & DevOps Engineering Bootcamp 2026

B.Eng. Environmental Engineering — University of Port Harcourt 2018.
